

Amendments to the Claims:

1. (Currently Amended) A compound, ~~characterized in that it corresponds~~ corresponding to the formula (I):

in which:

$\text{X}$  represents a hydrophilic group which is selected from a monosaccharide or a polysaccharide as well as amino derivatives of monosaccharides and polysaccharides, a poly(ethylene oxide) chain, a peptide chain, a polar ionic group selected from a quaternary ammonium, an amine oxide, or a carnitine group;

$m$  represents an integer equal to 1, 2 or 3;

$\text{Y}$  represents a spacer arm which is intended to link the aromatic nucleus to the hydrophilic  $\text{X}$  substituents;

$\text{Y}$  is selected from ester, amide, urea, urethane, ether, thioether and amine functions, and  $\text{C}_1\text{-C}_6$  hydrocarbon chains which are optionally interrupted by one or more ester, amide, urea or urethane functions and by one or more ether, amine or thioether bridges;

$y$  represents an integer equal to 0 or to 1;

$\text{Y}'$  represents a group selected from an ester function, an amide function, a urea function, a urethane function, an ether bridge or a thioether bridge;

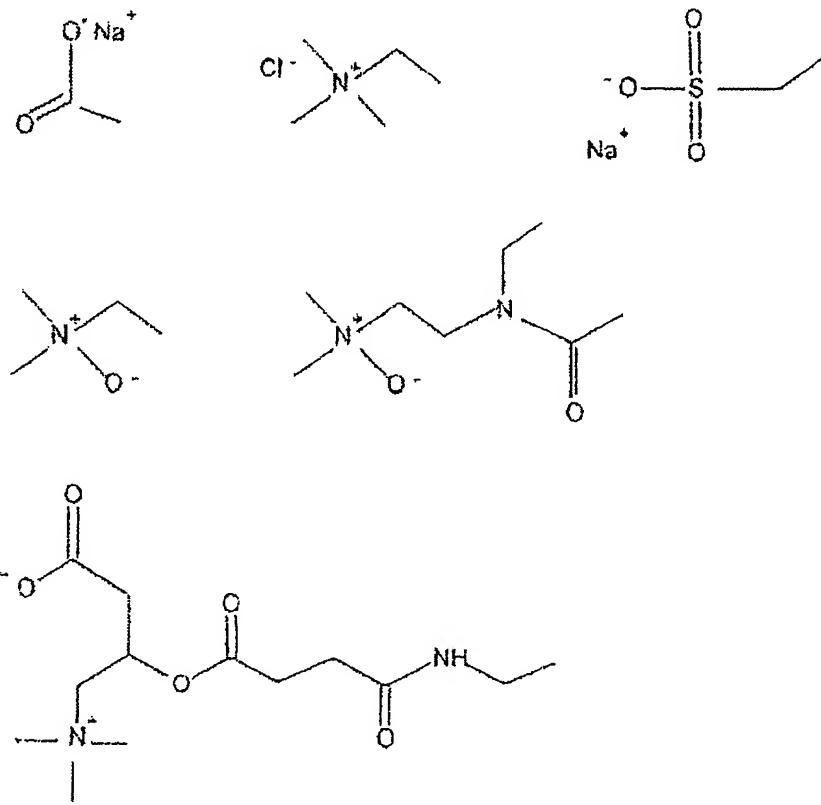

$m'$  is an integer selected from 1 and 2;

$\text{X}'$  represents a hydrogen atom or a  $\text{C}_4\text{-C}_{14}$  alkyl chain which is optionally substituted by one or more fluorine atoms.

2. (Currently Amended) The compound as claimed in claim 1, ~~characterized in that~~ wherein  $\text{X}$  represents a group selected from: glucose, lactose, fructose, mannose, galactose, ribose, maltose, glucosamine, sucrose and lactobionamide.

3. (Currently Amended) A compound as claimed in claim 1, characterized in that wherein X represents a group selected from poly(ethylene oxide) chains comprising from 30 to 100 ethylene oxide units, preferably from 50 to 60 units.

4. (Currently Amended) A compound as claimed in claim 1, characterized in that wherein X represents a group selected from

5. (Currently Amended) A compound as claimed in claim 1, characterized in that wherein at least one of the following conditions is satisfied:

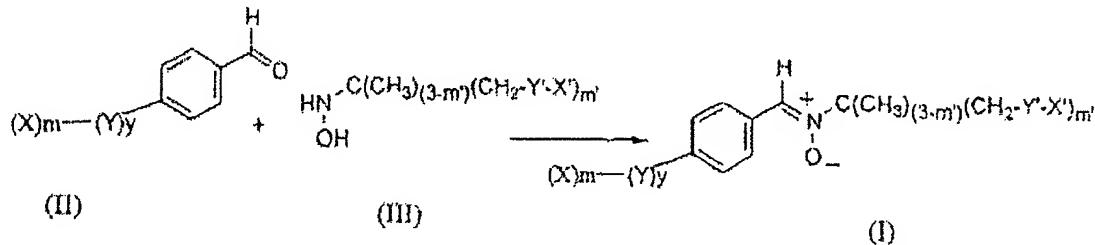

X represents a group selected from: lacto-bionamide, carnitine or a polyoxyethylene chain;

m represents 1;

m' represents 1 or 2;

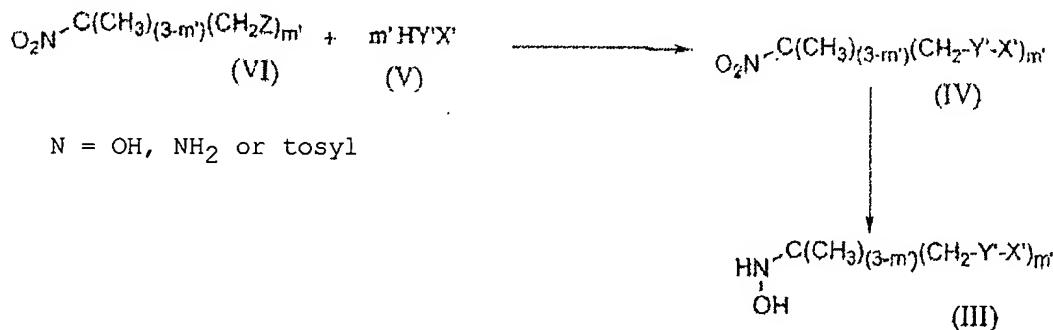

X' is selected from the groups octyl, decyl, dodecyl and  $\text{CF}_3(\text{CF}_2)_r\text{CH}_2\text{CH}_2-$ , where  $8 \geq r \geq 6$ .

6. (Currently Amended) A process for preparing a compound corresponding to the formula (I) as claimed in Claim 1 ~~any one of claims 1 to 5, with this process being characterized in that wherein~~ an aldehyde corresponding to the formula (II) is reacted with a hydroxylamine
- corresponding to the formula (III) in accordance with scheme 2 below:

Scheme 2

7. (Currently Amended) The process as claimed in claim 6, ~~characterized in that wherein~~ the compound of the formula (III) is prepared in accordance with a process which is described in scheme 3:

Scheme 3

8. (Currently Amended) A pharmaceutical composition comprising at least one compound corresponding to the formula (I) as claimed in Claim 1 ~~any one of claims 1 to 5~~ in a pharmaceutically acceptable excipient.

9. (Currently Amended) The use of a compound corresponding to the formula (I) as claimed in Claim 1 ~~any one of claims 1 to 5~~ for preparing a drug which is intended to prevent and/or treat the effects of free radicals.

10. (Currently Amended) The use of a compound as claimed in Claim 1 ~~any one of claims 1 to 5~~ for preparing a drug which is intended to prevent or treat the pathological conditions linked to oxidative stress and to the formation of oxygen-containing free radical species.

11. (Original) The use as claimed in claim 10 for preventing or treating a pathological condition selected from immune and inflammatory diseases, the ischemia-reperfusion syndrome, atherosclerosis, Alzheimer's disease, Parkinson's disease, lesions due to UV and ionizing radiations, Huntington's disease, cancers and cellular aging.

12. (Currently Amended) A cosmetic composition, ~~characterized in that it comprises comprising~~ at least one compound corresponding to the formula (I) as claimed in Claim 1 ~~any one of claims 1 to 5~~ in a cosmetically acceptable excipient.

13. (Currently Amended) A cosmetic treatment method for preventing and/or treating the effects of aging, ~~characterized in that comprising applying to the skin or to the epidermal appendages~~ a composition as claimed in claim 12 ~~is applied to the skin or to the epidermal appendages~~.

14. (Currently Amended) The use of a compound corresponding to formula (I) as claimed in Claim 1 ~~any one of claims 1 to 5~~ in organic synthesis as a free radical capturing agent in free radical reactions.
